FW5K Wallis & Futuna -update October 30

With over 36K QSOs in the log, FW5K crew go QRT on November 1st. Alex, K6VHF says that tomorrow (31st) most of the antennas will be packed away.

603T Somalia -update by Elvira IV3FSG

The location we found seems perfect – about 1300 meters above sea level – with a breathtaking view overlooking Hargeisa.

The only real obstacle is the strong radio noise, which often exceeds S9 for most of the day. But we're not discouraged. We've already set up new single-band antennas, including ones for the low bands, and we're working to get the most out of every situation.

XF4B Revillagigedo -update October 29

Mark **XF4B** (XE1B) reports that due to lack of internet and PC issues he has been unable to get on FT8. All stations signing FT8 as XF4B are Socorro Pirates.

3G9S DXpedition Navarino Island -update by CE2PM

After dedicating ourselves to our jobs to get some time for our expedition, we've summarized preparations for the small activity at 3G9S. We already have our plane tickets from Santiago to Punta Arenas and the ferry transfer to Navarino Island.

We already have the DXWorld-e 500W amplifier, and our Flex 8400 has also arrived, which we hope to configure so it can be used by radio amateurs around the world remotely. We still need to learn the configuration through Starlink, a new challenge. [3G9S – Navarino Island, SA-050 | DX-World](#)

3Y0K Bouvet Island -update

The 3Y0K team remains committed to activate Bouvet Island in 2026. Our project continues and it is on schedule, as planned, with a departure date of February 1, 2026 from Cape Town.

The team has a written contract that dictates how a shortfall of money shall be covered. Multiple members defaulted on that agreement as they for several months were refusing to pay their share of contractual obligations, exposing the team to a large financial risk, shortfall of money and cancellation of this and future DXpeditions. With a total budget of \$1,7M, where the team has already spent \$1,1M, the team has faced severe financial and contractual consequences due to their actions. Almost all of our equipment, like radio and amplifiers, are generously loaned by our sponsors, and while the antenna scope is important, it's a small cost in the total budget.

Pacific tour by Rudi DK7PE until November 19

KH2, GUAM as KG6/AH0G

T8, PALAU

V6, MICRONESIA as V6CW

V7, MARSHALL ISL as V73RK

T30, WESTERN KIRIBATI as T30RK

Chances of finding an affordable HF location on the islands are very limited. The prices per night are exorbitant like in the Caribbean and an S9 QRM level is guaranteed on most locations.

Therefore, I will also operate portable or out of a car. The advantage is having a good location near the sea, but the disadvantage is that I have to build up and take down my antennas every day... That is why my operation will not be 24/7... It will be a mixture of DXpedition, antenna experimenting and meeting local radio amateurs. Yes, I will try the low bands and of course 60m CW, where allowed. I'm looking forward to meeting you! Every QSO will be "hand made" with an ETM9c keyer – it will be an old school DXpedition.' <https://www.roody.de/>

5H, TANZANIA Maurizio IK2GZU is once again active as 5H3MB until November 20. He returns as a volunteer in the Ikelu hospital in the South Highlands. Operation during his spare time on HF using CW, SSB and digi. QSL via home call, LoTW, Club Log.

This year's contest was a wild ride. One of our radios was dead on arrival, the amplifier failed early, and our 40m vertical snapped in the wind. It felt like everything that could go wrong did. But we didn't quit. With backup gear, quick fixes, and a lot of teamwork, we pushed through the chaos. Despite the setbacks, we logged 4,500 SSB contacts—a result we're proud of.

After Vostok, says Frank, there's a possibility that Alex will go to Ridge B and operate from there. Nothing is certain about that yet so more info later. However, it would be an ATNO for the Worldwide Antarctic Program (WAP) and Polar DX Challenge as Ridge B has never been activated before.
